Intellectual Property

5 week online course & online exam

Obtaining a patent is a crucial step to safeguard the intellectual property of a novel biomedical invention and to raise funding for its development. In this five-week learning-by-doing course you will learn the pros and cons of patent protection and how to protect your biomedical invention in a timely and optimally manner.

In addition, you will learn the interplay between patent law and market exclusivity for medicinal products granted by regulatory agencies such as the FDA and EMA.

 **Starting dates next courses**

Start date: April 19th, 2021

Start date: October 11th, 2021

5 things you will take away from this course

- 1** Search and analyze patents in public databases, including their prosecution history and legal status
- 2** Identify different patenting routes, prepare a budget with cost estimates, and develop a cost-effective patenting
- 3** Understand the principles of patent enforcement procedures
- 4** Understand the principles behind patent valorization via licensing
- 5** Understand the interplay between patent law and market exclusivity for medicinal products granted by regulatory agencies such as the FDA and EMA

With contributions from

Aliko Nichogiannopoulou
European Patent Office

Marc Martens
Bird & Bird

Bart Swinkels
NLO

And many more

Full program

Week 1 - Patents for medical inventions

A brief introduction to all types of intellectual property rights

Interview with **Bart Swinkels**, Dutch and European patent attorney (NLO)

Topics

- Patenting vs Publishing
- Patent claims in medical life sciences
- Patenting of DNA sequences and antibodies : differences between the US and Europe
- Reading a patent: understanding all sections in a patent document

Practical cases

- The VIB case
- Filgotinib (Galapagos): differences between Europe and the US
- The Mayne vs. MSD case

Week 2 - Obtaining a patent throughout the world

Overview of the national, regional and international patenting routes

Interview with **Aliki Nichogiannopoulou**, Director at the European Patent Office

Working with the Paul Janssen Futurelab **Patent Portfolio Calculator**

Topics

- Working with patent databases: introduction to Espacenet
- Priority date vs. filing date
- Comparing the claims for filgotinib in the US and European patent
- Following an international patenting route
- Understanding an ISR and WO in a patent examination procedure
- Managing a patent portfolio

Practical cases

- The HeartSNP case
- Patenting a medical device
- Screening compounds using a cell line

Week 3 - Patent enforcement and infringement

Interviews with **Mika Mayer** (Cooley), **Maurits Westerik** (Croupy), **Marc Martens** (Bird & Bird)

Topics

- Freedom to operate : practical examples
- Absolute vs. relative protection of product claims and process claims
- Exclusivity: a term with many appearances
 - a. Supplementary Patent Certificate (SPC)
 - b. Data Exclusivity
 - c. Market Exclusivity
 - d. Paediatric Exclusivity
- Direct and Indirect Patent Infringement

Practical cases about direct and indirect patent infringement

- The CAR-T cells
- The Clopidogrel case in Belgium and the Netherlands

Week 4 – Patent valorisation via licensing and collaboration agreements

Interview with **Karin Verzijden** (Axon Lawyers)

Working with the Paul Janssen **Futurelab License Agreement Builder**

Topics

- Licensing in biotech collaborations
- Framework of a licensing agreement
- The various degrees of technology transfer agreements
- Typical clauses in a technology transfer agreement

Practical cases

- The cross-license between AVI BioPharma and Eleos
- The collaboration agreement between Gilead and Galapagos
- The licensing dispute between Ablynx and Unilever

Week 5 – case studies and in-depth assignments

Interview with **Ton van den Hoven**, former CEO of SurgVision

Cases

- Case 1 : the Amgen / Sanofi dispute about PCSK9 and “sufficient disclosure”
- Case 2 : Lundbeck’s dispute about escitalopram : the crossroads of IP and regulatory law
- Case 3 : Crucell’s PERC.6 cell line for the production of gene therapy vectors
- Case 4 : SurgVision’s imaging platform and fluorescent marker using bevacizumab

Final exam

You can schedule your online exam in a period several weeks after week 5. The exam takes one hour of your time. Once you pass this exam, you will receive a certificate. Just before the exam, you have the option to talk with the teacher to ask your last questions.

 Final videocall

Intellectual Property Online - April, 2021

Course length	5 weeks	Videocall 1	21 Apr 2021 16:30 to 18:30 (GMT +1)
Study load	7 hours a week	Videocall 2	6 May 2021 16:30 to 18:30 (GMT +1)
Online course starts	19 Apr 2021	Videocall 3	7 Jun 2021 16:30 to 18:30 (GMT +1)
Online exam period	9 to 16 June 2021		

Intellectual Property Online - October, 2021

Course length	5 weeks	Videocall 1	13 Oct 2021 16:30 to 18:30 (GMT +1)
Study load	7 hours a week	Videocall 2	27 Oct 2021 16:30 to 18:30 (GMT +1)
Online course starts	11 Oct 2021	Videocall 3	29 Nov 2021 16:30 to 18:30 (GMT +1)
Online exam period	1 to 8 Dec 2021

Bioscience

Our participants come from all over the world and represent different disciplines. They bring their own expertise, learning goals and perspective into the course.

Louis Declerck
Associate at Fund+

The only IP course you need to follow to further build upon in your career! Very clear and well organized with a very relevant and practical coaching approach.

Adam Cohen
Centre for Human Drug Research

When you advise biotech companies about intervention development, patent law is always close, but also very far away if you are not a specialized lawyer.

This course makes brilliant use of all digital possibilities to teach the non-legal professional all you ever wanted to know about intellectual property, but were afraid to ask!

Laurel Schunselaar
Leiden University Medical Centre

The interactive program of the course ensures that you easily understand the information and make it applicable. The real life cases make this course interesting for biomedical professionals.
